SUMMARY

Logical and results-driven Web Developer dedicated to building and optimizing user-focused websites for customers with various business objectives. Judicious and creative when crafting effective websites, apps, and platforms to propel competitive advantage and revenue growth. Technically proficient and analytical problem solver with a calm and focused demeanor.

EXPERIENCE

Full stack developer

Esight Business Solutions   **August 2020 - Present, Angamaly, Ernakulam**

· Building responsive and user-friendly web pages using HTML, CSS, and JavaScript
· Building and maintaining user interfaces for web applications using ReactJS
· Developing and maintaining server-side code using languages like Node.js
· Creating and maintaining databases using SQL or NoSQL technologies
· Implementing APIs to communicate with third-party services and other parts of the application
· Collaborating with other developers, designers, and stakeholders to ensure the application meets business and user requirements
· Troubleshooting and debugging issues with the application
· Staying up-to-date with industry trends and best practices

Quality Engineer

Matrix IES   **August 2019 - August 2020**

PROJECTS

Web applications

Experience in designing and developing Web applications · August 2020 - Present

· Applied my knowledge in HTML, CSS, Javascript (Node js, React js), and MySQL to develop web applications for different industrial needs
·Designed and developed the web application to be responsive and mobile-friendly, ensuring that it worked well on a variety of devices and screen sizes
· Worked to continuously improve the web application, including adding new features, optimizing performance, and improving the user experience
· Designed and developed the web application's content management system (CMS), including creating and managing content, and enabling content editors to easily update and publish content
· Worked in an Agile development environment, including participating in daily stand-up meetings, sprint planning, and retrospectives

ERP & CRM systems

Experience in design and development of ERP & CRM systems · October 2021 - Present

· Worked closely with stakeholders to understand their business processes and requirements. Conducted interviews, analyzed workflows, and identified pain points and areas for improvement
· Designed the architecture of the ERP system, including choosing the appropriate technologies and tools. This involved designing the data model, user interface, and workflows, as well as determining the integration points with other systems
· Developed and implemented the ERP system, working with a team of developers, testers, and other stakeholders. This involved writing code, creating database schemas, and implementing business logic
· Tested the system thoroughly to ensure that it met the business requirements and was free of bugs and errors
· Provided ongoing maintenance and support for the system, fixing bugs and implementing new features as needed. This involved working with end-users to troubleshoot issues and providing training and documentation as needed

Have experience working as part of developing many other static and dynamic websites.

EDUCATION

B.Tech in Mechanical Engineering

Capital University · Koderma, Jharkhand

SKILLS

Front end: HTML, CSS, JavaScript
Back end: Node.js
Libraries and frameworks: React.js, Express.js, Barba.js, JQuery
DBMS: MySQL, MongoDB
Design: Figma
